PROJECTS

- **UnaniAi** : Developed an AI-powered healthcare assistant that analyzes symptoms and provides personalized treatment recommendations using structured medical knowledge and natural language processing. The system integrates a fine-tuned large language model with relational databases to deliver context-aware suggestions.[link to project https://albot-grnk.onrender.com](https://albot-grnk.onrender.com)
- **Blyntrex** : clone similar to Instagram made using React [link blyntrex.vercel.app](https://blyntrex.vercel.app)
